MJB's Premier Vendor Managed Inventory Solution

In today's global marketplace, companies are faced with increased market pressures and fierce competition, which can gradually erode margins and overall profitability. In turn, these same companies must look for innovative ways to optimize their supply chains and increase efficiencies while reducing overall costs.

If this sounds like your company, look no further. MJB has created a premier Vendor On Site (VOS) inventory management solution that allows our customers instant access to the materials they need, without all the financial burden of carrying the inventory themselves. And MJB can customize this solution to fit your business.

With MJB's VOS program, MJB will place materials at your facility, where they are available to you on demand. You simply scan materials as you need them. The best part is this: You don't pay for any material until you use it. In addition, MJB will provide you with 24/7 access to our online bar code inventory tracking system, which means real-time visibility of your receipts and shipments. We carry the costs, providing you with visibility and tracking, and you simply use what you need, when you need it. MJB also offers consolidated billing to streamline your payables processing and increase administrative efficiencies.

Reduce Costs

MJB's Vendor On Site (VOS) inventory management solution offers significant cost savings opportunities to customers by shifting the burden of product procurement management, inventory control and logistics to MJB. We work with you to establish inventory levels, implement our bar code inventory tracking system and streamline your purchasing process. This real-time tracking provides MJB with instant visibility of your demand changes, so that we can proactively manage your stock levels and prevent out-of-stock situations. In turn, you eliminate inventory, reduce or refocus labor and optimize your supply chain. By partnering with MJB, you leverage our volume through an extensive network of manufacturing partners in the U.S. and abroad. You can also be confident that you're getting the most competitive prices in the marketplace.

Increase Efficiencies

MJB enhances operational efficiencies by streamlining your business processes and offering innovative technology to give you real-time visibility of your daily inventory needs. In addition, our "management by exception" approach allows you to subscribe to proactive notifications, refocusing your time and resources on only the items that need attention. With MJB, you consolidate your procurement and billing processes, and take advantage of cost savings by reducing transactions.

Improve Overall Profitability

MJB's VOS program eliminates inventory, improves cash flow and increases your return on investment, driving cost savings and operational efficiencies directly to your bottom line.

Sign up for REALINFO and get real-time access to open orders, delivery status and stocking levels.

MJB also offers tools for proactive management of exceptions, sending daily notifications for items that need attention. Notification alert types include:

- To Order Alert based on stocking level requirements
- Past Due Orders Alert
- Daily Usage Alert for all material consumed each day

To find out more about MJB's full range of innovative supply chain solutions—from customized inventory management and warehouse distribution to technology that gives you real-time access—call 972-401-0005 to speak to one of MJB's inventory management specialists, or go to www.mjbwood.com.

Benefits of MJB's VOS program include:

- Elimination of inventory carrying costs
- Reduction of expedited shipments with managed inventory levels
- Reduction or elimination of obsolete and slow-moving inventory
- Reduction or refocusing of labor in purchasing and inventory control
- Leveraging of MJB's volume purchasing power with all major panel products manufacturers
- Streamlining of your supply chain through MJB's extensive supplier network
- Improved cash flow
- Improved ROI
- Reduction of warehouse space, or expansion of manufacturing footprint with managed inventory levels
- Gained efficiencies through consolidated billing and purchasing
- Reduction of your total cost of ownership on material purchases
